

### **Structural Hire Requisition**

Must possess the ability to work independently on mid-scale commercial structural design engineering projects such as multi-family residential structures, senior living, offices, tenant build outs and historic renovations using a range of structural framing materials (steel, concrete, masonry, and wood). Projects and tasks will involve the use of various engineering software programs (RISA, ENERCALC), project management software and Microsoft Office applications.

*\*Experience with historic renovations and Revit drafting experience is a plus\**

#### *Technical/Project Responsibilities:*

- Responsible for overseeing all aspects of a structural project design from schematic phase through construction documents and including construction observation.
- Be able to complete a total gravity and lateral building design independently.
- Accountable for complete construction plans and specifications.
- Produce construction drawings solely or with assistance of junior level engineer.
- Coordination with Architect and General Contractor throughout project from pre-construction effort to project completion. This will include email correspondence, documentation of coordination, and meetings.
- Construction administration oversight including submittal review, RFI response, and field observations.
- Serve as an internal Project Manager for multi-disciplinary projects, coordinating with our Survey and Civil departments as needed.
- Track project financials and create and send invoices.
- Project sizes will range from residential to multi-story new construction projects.
- Applicant must be willing to work on a variety of projects simultaneously.

#### *Leadership*

- Provide technical support to coach and develop entry level engineers and other staff.

#### *Minimum Qualifications:*

- Bachelor's Degree in Civil Engineering with a focus in Structural Engineering
- 5 years of professional experience in commercial building construction
- PE licensure is not required, but applicant must be on track to earning PE licensure
- Must have experience in AutoCAD or Revit. Revit experience is preferred and will be the standard drafting method for this position

Additional Qualifications:

- A portfolio of design projects should be submitted along with description of design efforts that were fully completed by the applicant

*About us:*

*Batture is dedicated to the idea that a highly inspired team can deliver outstanding results while also creating powerful social and environmental change. During every one of our engineering projects, we are energized by this unique purpose.*

*Since opening in 2014 have staffed our firm to be the unrivalled local leader in green infrastructure and resiliency projects in the New Orleans Metro Area. Our civil work is centered around infrastructure and development, with projects ranging from historic renovations to large neighborhood-wide green infrastructure projects. Our structural design projects range from historic renovations on Canal Street and the French Quarter to new mid-rise construction in the CBD to the design of recreational park infrastructure. We have a relationship with many of our city's architecture firms and we enjoy using our expertise to further historic preservation and to be a part of design teams that are bringing innovative and sustainable projects to completion.*

*Batture is an equal opportunity employer. We do not discriminate in employment, recruitment, advertisements for employment, compensation, termination, promotions and other conditions of employment against any employee or job applicant on the basis of race, color, gender, national origin, age, religion, creed, disability, veteran's status, sexual orientation, gender identity or gender expression.*
